EDUCATION

Lehigh University

Bachelor of Science in Computer Science, GPA: 3.56

Bethlehem, PA

May 2025

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, C#, SQL, HTML / CSS

Frameworks: React, Next.js, Node.js, Express.js, .NET, Spring Boot

Databases: MongoDB, PostgreSQL, Oracle, Firebase, DynamoDB

Cloud & DevOps: AWS (S3, EKS), Docker, Kubernetes, Gitlab CI/CD

Tools: Postman, Git, Linux, Maven, Jira, Jenkins

EXPERIENCE

Barclays

Jul 2025 – Present

Technology Analyst (Software Engineer)

Wilmington, DE

- Building a **multi-agent AI platform** that automates legacy API modernization by generating OpenAPI specifications and service implementations, eliminating hours of manual engineering effort per API.
- Designing and developing an **LLM-driven feedback pipeline** using GitLab webhooks that incorporates human review to continuously improve generated OpenAPI specifications and service implementations.
- Implementing a React and TypeScript workflow management dashboard for monitoring agent execution, visualizing pipeline status, and orchestrating multi-step automation workflows.
- Developing backend services and REST APIs for agent lifecycle management, task orchestration, execution tracking, and workflow state persistence.
- Building a Python-based Model Context Protocol (MCP) integration for GitLab that automates branch creation, commits, pull requests, and repository interactions for AI-generated code.
- Maintaining Kubernetes (AWS EKS) deployments for multiple AI services, deploying Docker images, monitoring pod health, and validating updates to agentic AI workflows and MCP tooling.
- Integrated **Qualtrics surveys across Barclays card-servicing websites** by hosting the JavaScript library and automating deployments via GitLab CI/CD, Jenkins, and AWS S3.

Comcast - NBCUniversal

Jun 2024 – Aug 2024

Software Engineer Intern

New York, NY

- Migrated a financial reporting application to a modern technology stack, improving report processing time **by 25%**.
- Built an administrative snapshot module with full CRUD functionality using TypeScript and .NET, enabling accountants to manage and visualize financial datasets efficiently.
- Delivered **8+** production features including dashboards, report generation, data export, and interactive graph visualizations using React.

Studio Corsair

Jan 2024 – May 2024

Full Stack Development Intern

Remote

- Delivered payroll automation features using TypeScript and Jest for an internal payment system, **improving payroll efficiency by 50%**.
- Integrated TimeDoctor and Revolut APIs to automate payments based on tracked hours, ensuring accurate and timely payroll management.

New York City Housing Development Corporation

Jun 2023 – Aug 2023

Application Development Intern

New York, NY

- Developed an HR application with C# and .NET to manage employee data, reducing employee badge printing time **by 50%**.

PROJECTS

Lutron Floor Plan Application | NextJS, TypeScript, Firebase, Jest, Socket.IO

Jan 2024 – Dec 2024

- Engineered a real time collaborative application for Lutron liaisons to upload and annotate floor plans, enabling real-time multi-user collaboration.
- Built the application with Next.js, React, Firebase, and TypeScript for collaborative floor plan management.
- Developed real-time annotation functionality with Socket.IO and FabricJS for seamless multi-user interaction.
